

PELLA FIBER WANTS TO BE YOUR PARTNER, NOT JUST YOUR PROVIDER.

We offer side-by-side cost comparisons, custom solutions, and onboarding.

BUSINESS SOLUTIONS

DESKTOPS. LAPTOPS. TABLETS. SMARTPHONES. VIDEO CONFERENCES. THE CLOUD. The technology of doing business is changing every day, and having a **fast, reliable internet connection is more important than ever.**

Pella Fiber is dedicated to helping the businesses in our community thrive. That's why we're excited to bring high-speed, fiber-rich internet to your door!

To schedule a consult today, email sales@pellafiber.com or call 641-628-4173.

Part of our process is meeting with you and preparing a side-by-side cost comparison to your current provider. We also create a sample invoice with your info, so you can see exactly what you're paying for.

If you need something unique—like a specialized setup for a large business—ask! Because we're local, we love to create custom solutions.

Your IT team will have questions, and we are happy to answer! Pella Fiber does a thorough onboarding with anyone in your organization who needs it.

HOW CAN FIBER INTERNET BOOST YOUR BUSINESS?

Whether your business is a crew of two or two hundred, the benefits of a fiber connection through Pella Fiber are clear.

SPEED

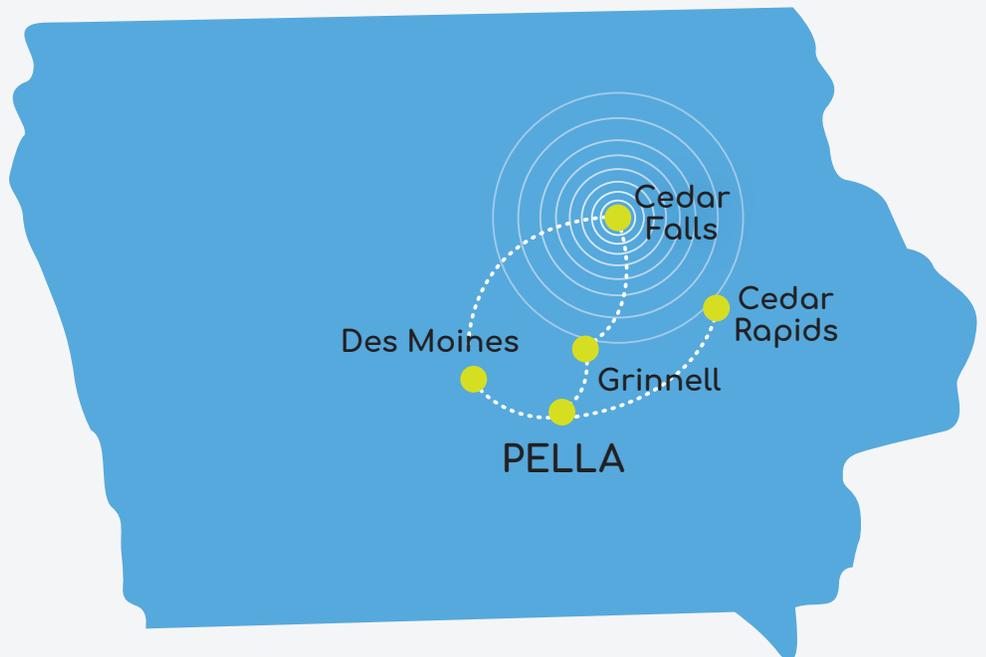

Pella Fiber is the only provider in the area to offer symmetrical upload and download speeds. That means less wait time and high-quality videoconferencing, plus the bandwidth to support many connected devices.

QUALITY OF LIFE

Fast and reliable internet makes working from home a better experience. It also means economic development opportunities that benefit the whole community in the long run.

REDUNDANCY

The Pella Fiber network will be routed through physically diverse network locations. That means you won't lose your connection, even if a hub is disrupted—like by a fire or a major weather event.

TECHNOLOGY

We're committed to using the latest technology, like MESH Wi-Fi Extenders that can be managed for each of your employees through an online dashboard.

RELIABILITY

Fiber optic cable is sturdy, and connections are built to last for decades. You won't face network congestion issues like you might with cable.
